New Students: Introduction to Computing Support

Duncan C. White
d.white@imperial.ac.uk

Dept of Computing, Imperial College London

15th Sept 2022

There are two computing support organizations at Imperial.

- ICT (Information and Communication Technologies) - a large organization that supports all of College, providing general purpose IT and Comms support..

There are two computing support organizations at Imperial.

- ICT (Information and Communication Technologies) - a large organization that supports all of College, providing general purpose IT and Comms support..
- CSG (the Computing Support Group - only in the Dept of Computing) - a small organization providing specialist Computer Science computer support.

- ICT (Information and Communication Technologies) - a large organization that supports all of College, providing general purpose IT and Comms support..
- CSG (the Computing Support Group - only in the Dept of Computing) - a small organization providing specialist Computer Science computer support.

ICT Services that you'll use:

- Panopto - lecture recording and broadcasting.
- Celcat - central timetable.
- Networking (including WiFi).
- College Email.
- User authentication for staff and students (College passwords).
- The printing system - printers and photocopiers.

CSG Services that you'll use:

- **300 seat Lab**: We maintain and run a large computer laboratory, on level 2 of the Huxley building, for you to use - whether physically or remotely.

CSG Services that you'll use:

- 300 seat Lab: We maintain and run a large computer laboratory, on level 2 of the Huxley building, for you to use - whether physically or remotely.
- The lab PCs run a mixture of a CSG-supported "DoC Linux" (Ubuntu 22.04), and a CSG-supported "DoC desktop Windows" (Windows 10), with a large variety of computer science related software packages installed.

CSG Services that you'll use:

- 300 seat Lab: We maintain and run a large computer laboratory, on level 2 of the Huxley building, for you to use - whether physically or remotely.
- The lab PCs run a mixture of a CSG-supported "DoC Linux" (Ubuntu 22.04), and a CSG-supported "DoC desktop Windows" (Windows 10), with a large variety of computer science related software packages installed.
- Private Cloud: we run our own Private *Infrastructure-as-a-service* Cloud, that allows you to create up to 10 Virtual Machines via a web interface - great for experiments, group projects and so on.

- Gitlab: Git-repo hosting service: Git is a version control system. Gitlab is a Git repository hosting service, used for teaching and research. Every time you start a new laboratory exercise, a Gitlab repo is created automatically to hold it.

- A Slurm GPU cluster to enable you to run machine learning experiments on a variety of machines with GPUs (Graphics Processors) installed.

CSG maintain a wide variety of specialist Departmental servers:

- Fileservers store your home directories, and shared volumes such as /vol/bitbucket.

CSG maintain a wide variety of specialist Departmental servers:

- Fileservers store your home directories, and shared volumes such as /vol/bitbucket.
- Web servers serve various Departmental web pages - and via the public_html directory in your home directory, your personal web pages and CGI scripts.

CSG maintain a wide variety of specialist Departmental servers:

- Fileservers store your home directories, and shared volumes such as /vol/bitbucket.
- Web servers serve various Departmental web pages - and via the public_html directory in your home directory, your personal web pages and CGI scripts.
- We maintain several Postgres Database servers used for teaching, administration and research, including https://db.doc.ic.ac.uk/ on which every student can create their own personal (initially empty) Postgres database to use.

- LabTS which compiles and runs tests on your exercise submissions.

Please do report problems to us.

- You'd be amazed how few people actually bother to tell us when something doesn't work right, then get irritated when we don't fix it.

Please do report problems to us.

- You'd be amazed how few people actually bother to tell us when something doesn't work right, then get irritated when we don't fix it.
- *If we don't know something's broken, we can't fix it!*

Please do report problems to us.

- You'd be amazed how few people actually bother to tell us when something doesn't work right, then get irritated when we don't fix it.
- *If we don't know something's broken, we can't fix it!*
- When reporting problems, put yourselves in our shoes for a moment, think about what information we'll need, and volunteer that information without waiting for us to ask. Read Eric Raymond's internet guide How to ask questions the Smart way.

- When reporting problems, put yourselves in our shoes for a moment, think about what information we'll need, and volunteer that information without waiting for us to ask. Read Eric Raymond's internet guide How to ask questions the Smart way.

- If you're not sure whether the problem is with a CSG service or an ICT service - contact us (CSG) in the first instance, we'll redirect you onto ICT if appropriate. Over time you'll learn who to ask for what, don't worry about that yet.
